Software Engineer

Software Engineer with 4+ years of experience in Web/App development and a strong background in UI/UX design. Skilled in managing the full product cycle—from user research and wireframing to coding. My multidisciplinary approach ensures optimized workflows and high-quality products that balance seamless functionality with superior aesthetics.

EXPERIENCE

KAIMADATA - HANOI • **Full-Stack Developer** 5/2025 - Present

Job Recruitment Platform - (Japanese client)

- Technologies: Flutter, Ruby on Rails (Team members: 6)

- Managed the operation and development of 18 recruitment applications customized for 18 distinct corporate clients.
- Handled routine maintenance and version upgrades to ensure platform compatibility and stability.
- Enhanced the payment transfer flow and push notification engine for better reliability.

Elderly Care Management System - (Japanese client)

- Technologies: Vue.js, Java Spring Boot (Team members: 100+)

- Full Project Lifecycle Involvement.

- Design & Analysis: Researched functional business logic on old software, analyzed complex calculation logic within PowerBuilder source code to wrote API Design Documents.
- Programming: Developed code according to design docs, integrated APIs between Front-end and Back-end, and wrote unit tests. Participated in coding for Jasper file exports.
- UT/IT: Created test cases and performed testing in the staging environment. Communicated with overseas/remote branches via Redmine for clarification and bug fixing.

VNPT - CANTHO • **UI/UX - Full-Stack Developer** 4/2024 - 3/2025

Women's Union Management System - (Vietnamese client)

- Technologies: Vue.js, Nest.js, Figma (Team members: 4)

- Joined the customer requirement survey phase. Designed UI on Figma and demoed the system to customers for feedback.
- Leadership: Managed the team by estimating workloads and delegating tasks to ensure efficient project delivery.
- Programming: Configured JWT-based authentication to enhance system security. Built modular and reusable components to optimize UI development and maintainability.

Political School Management System - (Vietnamese client)

- Technologies: Vue.js, Java Spring Boot, Figma (Team members: 5+)

- Joined the customer requirement survey phase. Designed UI on Figma and demoed the system to customers for feedback.
- Programmed functions in a Microservices environment; set up Java-based authorization. Managed FE state with Vuex configuration.

Skills

Front-end

React: Next.js, Tailwind, MUI, CEO, HTML/CSS, Redux, Bootstrap, Shadcn-UI

Vue: Vuex, Pinia, Element-plus, Vuetify, Nuxt.js

Flutter: Clean architecture, Bloc, GetX, Provider, Fire Base, Map, Google ads, (Android/IOS),...

Back-end

Node: Nest.js, Socket, API, Crawl Data, Authenticate,...

Java: I can create a base api, working with microservice.

Ruby: I can create a base api, API documentation (Swagger), implementing secure payment/ transaction flows

Database: MySQL, Mongo db, Postgres, SQL Server.

Others

UI/UX design with Figma, CI/CD, Docker, Gitlab Runer, Deploy, Nginx, Sub-lead, teamwork, creative, code game Godot.

Education

CanTho University

I graduated with a degree in software engineering with a 3.58 GPA.

Certificate

Graduate Certificate of English Language Proficiency LEVEL A2.

EXPERIENCE

Medical record management - (Vietnamese client)

- Technologies: Flutter, Figma (Team members: 5)

- Designed user interfaces for a mobile application, ensuring a user-friendly experience.
- Translated Figma designs into functional interfaces using Flutter. Integrated APIs to implement core features of the application.

VHEC - CANTHO • **Front-end Developer** 7/2022 - 3/2024

Diary management project - (Japanese client)

- Technologies: Flutter, Ruby on Rails (Team members: 5)

- Leadership & Management: Acted as Sub-lead responsible for task allocation, progress monitoring, and conducting code reviews to ensure high software quality.
- Architecture & Core Development: Established the project foundation by defining a scalable Flutter architecture with GetX and configuring Firebase for end-to-end push notification workflows. Developed specialized video playback features.

Banana disease analysis app - (European client)

- Technologies: Flutter, Java (Team members: 3)

- Feature Integration: Integrated Google Maps API to enable real-time tracking and visualization of diseased crop areas.
- Data Visualization: Processed and rendered complex analytical data into intuitive, user-friendly UI components.
- UI/UX Redesign: Led the UI upgrade by designing high-fidelity prototypes in Figma to enhance the overall user experience.
- App Optimization: Actively contributed to continuous application improvements and performance tuning.

Zoom Meeting Management Website - (Japanese client)

- Technologies: Node.js (Nest.js), MySql (Team members: 3)

- Developed Meeting Management APIs with NestJS and MySQL.
- Architected and implemented a PostgreSQL-to-MySQL data migration tool to streamline system transitions.

PERSONAL PROJECTS

See more at https://www.behance.net/vitanhbi4

Kruskal Algorithm Graph editor website

- Technologies: HTML DOM, Animation CSS

- Description: A GUI-based graph tool featuring an integrated Kruskal's Algorithm for Minimum Spanning Tree calculation.

- Link: https://vietanhyoyo.github.io/graphEditor/

Music listening Application

- Technologies: Flutter, Next.js, Node.js, Mongodb

- Description: An application that allows users to search for and listen to movie soundtracks.

- Link: https://popcornsound.com/

E-commerce website

- Technologies: React.js, Node.js, Mongodb, Socket IO

- Description: An e-commerce website that allows users to search for products and make purchases, integrated with PayPal for payment.

Primary School Management Website - (Graduation thesis)

- Technologies: React.js, Node.js, Mongodb, Socket IO

- Description: A primary school management website that allows teachers and students to interact with each other through the website. Features include viewing timetables, chatting, posting announcements, and uploading teaching videos.

Pixel game

- Technologies: Java, Designed characters myself

- Description: Developed a 2D kingdom defense game featuring wave-based enemy systems and resource management.

- Link: https://www.behance.net/gallery/132863579/Mini-Pixel-Game
